Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 - Switzerland

SAFETY DATA SHEET

Foodoil SK 6000

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

| Product name | |
|--------------|--|
| Article No. | |

: Foodoil SK 6000 : 00718-01

1.2 Relevant identified uses of the substance or mixture and uses advised against

| Identified uses | |
|---|--|
| Industrial use only. Lubricants, greases, release products | |
| Uses advised against | |
| Consumer use. | |

1.3 Details of the supplier of the safety data sheet

| Manufacturer | : | BLASER SWISSLUBE AG Winterseistrasse 22 CH-3415 Hasle-Rüegsau Switzerland Tel:+41 (0)34 460 01 01 E-Mail: contact@blaser.com |
|---|----|---|
| e-mail address of person responsible for this SDS | : | reach@blaser.com |
| 1.4 Emergency telephone nur | nb | er |

National advisory body/Poison Centre

| tutional addition for a | |
|-------------------------|--|
| Telephone number | : 145 (from abroad: +41 44 251 51 51) Information: +41 44 251 66 66 |

SECTION 2: Hazards identification

| 2.1 Classification of the | substance or mixture | |
|---|--|--|
| Product definition | : Mixture | |
| Classification accordine Not classified. | g to Regulation (EC) No. 1272/2008 [CLP/GHS] | |
| | | |

The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 11 for more detailed information on health effects and symptoms.

| 2.2 Label elements | |
|-----------------------------|---|
| Signal word | : No signal word. |
| Hazard statements | : No known significant effects or critical hazards. |
| Precautionary statements | |
| Supplemental label elements | : EUH210 - Safety data sheet available on request. |

SECTION 2: Hazards identification

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

2.3 Other hazards

Foodoil SK 6000

Product meets the criteria
for PBT or vPvB according
to Regulation (EC) No.
1907/2006, Annex XIIIThis mixture does not contain any substances that are assessed to be a PBT or a
vPvB.Other hazards which do: None known.

not result in classification

SECTION 3: Composition/information on ingredients

: Not applicable.

| 3.2 Mixtures | : Mixture | | | | |
|---|---|------|---|---|------|
| Product/ingredient name | Identifiers | % | Classification | Specific Conc. Limits, M-factors and ATEs | Туре |
| reaction mass of: triphenylthiophosphate and tertiary butylated phenyl derivatives | REACH #: 01-2119480426-35 EC: 421-820-9 CAS: 192268-65-8 | <1 | Repr. 2, H361 (oral, inhalation) Aquatic Chronic 4, H413 | - | [1] |
| Benzenamine, N-phenyl-, reaction products with 2,4,4-trimethylpentene | EC: 270-128-1 CAS: 68411-46-1 | ≤0.5 | Repr. 2, H361f | - | [1] |
| | | | See Section 16 for the full text of the H statements declared above. | | |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

| 4.1 Description of first aid m | neasures |
|--------------------------------|--|
| Eye contact | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. |
| Inhalation | : Avoid breathing vapour or mist. Get medical attention if symptoms occur. |
| Skin contact | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. |
| Ingestion | : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. |

4.2 Most important symptoms and effects, both acute and delayed <u>Over-exposure signs/symptoms</u>

 Date of issue/Date of revision
 : 20. Dec. 2023
 Date of previous issue

SECTION 4: First aid measures

Foodoil SK 6000

| Eye contact | : No specific data. |
|--------------|---------------------|
| Inhalation | : No specific data. |
| Skin contact | : No specific data. |
| Ingestion | : No specific data. |
| | |

4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician | : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
|---------------------|--|
| Specific treatments | : No specific treatment. |

SECTION 5: Firefighting measures

| 5.1 Extinguishing media | |
|--|---|
| Suitable extinguishing media | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : None known. |
| 5.2 Special hazards arising f | om the substance or mixture |
| Hazards from the substance or mixture | : In a fire or if heated, a pressure increase will occur and the container may burst. |
| Hazardous combustion products | : Decomposition products may include the following materials: carbon dioxide carbon monoxide |
| 5.3 Advice for firefighters | |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) |

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

chemical incidents.

| For non-emergency personnel | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment. |
|--------------------------------|---|--|
| For emergency responders | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". |
| 6.2 Environmental precautions | : | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
| | | |

6.3 Methods and material for containment and cleaning up

Small spill

: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

conforming to European standard EN 469 will provide a basic level of protection for

SECTION 6: Accidental release measures

| Large spill | : Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. |
|---------------------------------|--|
| 6.4 Reference to other sections | : See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information. |

SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling

Foodoil SK 6000

| Protective measures | Put on appropriate personal protective equipment (see Section 8). | |
|--|---|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. | |

7.2 Conditions for safe storage, including any incompatibilities

Store between the following temperatures: -10 to 40°C (14 to 104°F). Shelf life: 36 months. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

7.3 Specific end use(s)

Recommendations

: Not available.

Industrial sector specific solutions

: Not available.

SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

8.1 Control parameters

Occupational exposure limits

No exposure limit value known.

Biological exposure indices

No exposure indices known.

Recommended monitoring procedures : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs

SECTION 8: Exposure controls/personal protection

No DNELs/DMELs available.

PNECs

Foodoil SK 6000

No PNECs available

| 8.2 Exposure controls | | |
|----------------------------------|---|------------------------|
| Appropriate engineering controls | Good general ventilation should be sufficient to control worker exposure to a contaminants. | airborne |
| Individual protection meas | | |
| Hygiene measures | Wash hands, forearms and face thoroughly after handling chemical product before eating, smoking and using the lavatory and at the end of the working Appropriate techniques should be used to remove potentially contaminated Wash contaminated clothing before reusing. Ensure that eyewash stations safety showers are close to the workstation location. |) period. clothing. |
| Eye/face protection | Safety eyewear complying with an approved standard should be used when assessment indicates this is necessary to avoid exposure to liquid splashes gases or dusts. If contact is possible, the following protection should be wo unless the assessment indicates a higher degree of protection: safety glass side-shields. | s, mists, orn, |
| Skin protection | | |
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard be worn at all times when handling chemical products if a risk assessment is this is necessary. | |
| Body protection | Personal protective equipment for the body should be selected based on the being performed and the risks involved before handling this product. | e task |
| Other skin protection | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved before h this product. | |
| Respiratory protection | A respirator is not needed under normal and intended conditions of product workers are exposed to concentrations above the exposure limit, they must appropriate, certified respirators. | |
| Environmental exposure controls | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legisles. In some cases, fume scrubbers, filters or engineering modifications to the p equipment will be necessary to reduce emissions to acceptable levels. | lation. |

SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

9.1 Information on basic physical and chemical properties

| <u>Appearance</u> | |
|---|--|
| Physical state | : Liquid. |
| Colour | : Colourless. |
| Odour | : Characteristic. |
| Odour threshold | : Not available. |
| Melting point/freezing point | : Not available. |
| Pour point | : <-6°C |
| Initial boiling point and boiling range | : Not available. |
| Flammability (solid, gas) | : Not available. |
| Upper/lower flammability or explosive limits | : Not available. |
| Flash point | : Open cup: 230°C |
| Auto-ignition temperature | : Not available. |
| Date of issue/Date of revision | : 20. Dec. 2023 Date of previous issue |

5/11

SECTION 9: Physical and chemical properties

| Decomposition temperature | : Not available. |
|--|---|
| рН | : Not applicable. |
| Viscosity | : Kinematic (40°C): 6000 mm ² /s |
| Solubility in water | : No. |
| Partition coefficient: n-octanol/ water | : Not applicable. |
| Vapour pressure | : Not available. |
| Relative density | : Not available. |
| Density | : 0.894 g/cm³ [20°C] |
| Vapour density | : Not available. |
| Particle characteristics | |
| Median particle size | : Not applicable. |
| 9.2.1 Information with regard to | physical hazard classes |
| Explosive properties | : Not available. |
| Oxidising properties | : Not available. |

: No.

SECTION 10: Stability and reactivity

9.2.2 Other safety characteristics

Miscible with water

| 10.1 Reactivity | : | No specific test data related to reactivity available for this product or its ingredients. |
|--|---|--|
| 10.2 Chemical stability | : | Shelf life: 36 months. |
| 10.3 Possibility of hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur. |
| 10.4 Conditions to avoid | : | No specific data. |
| 10.5 Incompatible materials | : | No specific data. |
| 10.6 Hazardous decomposition products | | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
|---|----------------|---------|-------------|----------|
| reaction mass of: triphenylthiophosphate and tertiary butylated phenyl derivatives | LD50 Dermal | Rat | >2000 mg/kg | - |
| | LD50 Oral | Rat | >2000 mg/kg | - |
| Benzenamine, N-phenyl-, reaction products with 2,4,4-trimethylpentene | LD50 Dermal | Rat | >5000 mg/kg | - |
| | LD50 Oral | Rat | >5000 mg/kg | - |
| Conclusion/Summary | Not available. | | | |
| Acute toxicity estimates | | | | |

SECTION 12: Ecological information

12.7 Other adverse effects

No known significant effects or critical hazards.

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

Product

| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
|---------------------|---|
|---------------------|---|

Hazardous waste

European waste catalogue (EWC)

| Waste code | Waste designation |
|---------------------|--|
| 13 02 06* | synthetic engine, gear and lubricating oils |
| Packaging | |
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. |

runoff and contact with soil, waterways, drains and sewers.

Special precautions

when recycling is not feasible.
This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and
